

PRESS RELEASE

RELIBELL JOINS CERTANIA

The expert in certification of renewable energy plants joins CERTANIA group.

Munich/Erfurt, April 9, 2024. Relibell has partnered with CERTANIA, a growing group specializing in Testing, Inspection, and Certification services. This strategic move allows Relibell, a leading provider for compliance certification of plants for renewable energy such as wind, photovoltaic (PV), biogas and hydropower, to accelerate growth.

Established in 2020 and headquartered in Erfurt, Germany, Relibell has emerged as an expert and trusted partner serving operators, builders, planners, and suppliers of renewable energy plants with compliance certification before being connected to the grid. Relibell currently issues plant certification type A, B, & C, as well as EZA declarations of conformity.

Joining CERTANIA marks a significant milestone for Relibell, opening doors to broaden its compliance services to renewable power plants. This partnership enhances the company's ability to provide safety, quality, and regulatory compliance services for renewable energy plants.

Under the leadership of Managing Director Tobias Walter, the Relibell management team retains independence while accessing the resources of the larger group, facilitating continued growth and service expansion. Says Tobias Walter about the strategic move: „With the joint expertise and the collaboration with other CERTANIA partner companies, we will be able to support more customers in this fast-growing market segment. Being part of CERTANIA enables us to further invest in our service portfolio and infrastructure, providing innovative knowledge management tools. “

Relibell's offering of certification services for the electrical power sector including photovoltaics, wind, biogas and hydro perfectly fits into CERTANIA's certification and verification segment.

Moritz Gruber, CEO and managing shareholder of CERTANIA, welcomes Relibell and extends the invitation to join this unique group to other entrepreneurs and owners of companies in the field of scientific, laboratory, and compliance services: “We provide an opportunity to put their company into a future-proof structure. It is our fundamental aim to build a group for the long run, where strong partner companies flourish, while retaining their identity. With the addition of Relibell, we can now serve the renewable energy market, supporting Germany's ambitious sustainable energy goal of 80% by 2030”.

CERTANIA's ecosystem provides a platform for mid-sized, knowledge-based companies to thrive under one umbrella, maintaining entrepreneurial freedom while benefiting from group resources and support.

About Relibell: Relibell Zertifizierungsgesellschaft mbH, established in 2020 and based in Erfurt, Germany, is a leading service provider specialized in certifying renewable energy plants such as wind, photovoltaic (PV), biogas, and hydropower. We issue compliance certificates for operators, builders, planners, and suppliers. Our core competencies include issuing plant certification types A, B, and C, and EZA declarations of conformity. Accredited by DAkkS according to DIN EN ISO/IEC 17065, we're committed to environmental responsibility. For more information, visit relibell.de

About CERTANIA: Under the umbrella of CERTANIA Holding GmbH, a new global market player is created in the field of Testing, Inspection & Certification as well as scientific, laboratory and compliance services. This group offers entrepreneurs a sustainable home for their life's work. CERTANIA enables entrepreneurs and owners to further develop their companies with like-minded people, while continuing to preserve their entrepreneurial roots, corporate culture, brand, and values.
