

JASCHEK MT strengthens ROBUR's Relocation and Installation expertise.

Munich, December 19, 2022

The relocation and installation specialist JASCHEK MT (Munich, Regensburg, Bamberg) becomes part of ROBUR and thus strengthens the group's portfolio in this area around the existing ROBUR partners TEC (Dormagen) and WIR (Eltmann).

"As JASCHEK MT, we can look back on more than 40 years of experience in the smooth execution of complex industrial assemblies," explains Tommy Füllner, Managing Director and owner of JASCHEK MT "During this time, colleagues from ROBUR kept running into us and after initially appreciative competition, we realized over time that we complement each other excellently in our product portfolio and in our customer segments," continues Tommy Füllner out.

"Tommy and his team have a lot of experience and together we want to further expand our market position in the automotive sector," says Dennis Mausberg, Senior Partner at ROBUR and CEO of the Industrial Transformation business unit. "Here we can optimally interlock our service portfolio with one another, supplemented by offers in the field of steel construction and an expanded vehicle fleet. This is how we offer our customers a holistic offer and generate considerable added value for them," adds Dennis Mausberg.

With its extensive machine park and locations in Munich, Regensburg and Bamberg, JASCHEK MT can provide further hubs for ROBUR on the one hand and can also fall back on the many locations of the group in Germany and Europe.

"We want to support the industry in the challenges of transformation with our know-how, our experience, and our range of services. Be it modernization, digitization, automation or relocation or installation of our customers' systems," explains Jan-Jörg Müller-Seiler, Managing Partner and CEO of ROBUR. "With JASCHEK MT and Tommy we have found the perfect addition to our portfolio, and we are pleased that he and his team have become part of ROBUR and that they would also like to take on an active role in Dennis' Industrial Transformation business unit," adds Müller-Seiler.

"ROBUR is an industrial service specialist and as such we strive to constantly expand our group of specialists and to supplement our portfolio of services. The exchange with Tommy was friendly, cordial and based on partnership right from the start and it was therefore quickly clear that the team at JASCHEK MT will be an enrichment for the whole group", Florian Kopp, co-founder and Managing Partner of ROBUR, explains this step towards further expansion of the group.

"We still have a lot planned as ROBUR. With Tommy and his team, we have laid another building block for the successful growth of the group and are thus living up to our claim as a leading full-service provider for ecological and industrial change - welcome to the team!" concludes Jan-Jörg Müller-Seiler.

About ROBUR Industry Service Group GmbH (ROBUR):

Founded in 2015 in response to the ecological change of industries and the changing challenges of high-quality and increasingly digital industrial services, ROBUR now ranks among the top 10 industrial service providers in Germany with sales of over EUR 300 million in 2023 and an established global presence.

Both the financing and the leadership of the group are characterized by partnership and entrepreneurialism. Our member companies benefit from the size and internationality of the group and can leverage sales, capacity utilization and management synergies.

About 3,000 colleagues globally work in the wind, water, energy, industrials and process industries. As expert partners for our customers, we create holistic solutions from the planning and realization to maintenance and operation, to the relocation and decommissioning and support our customers with digital, automation and data-insights solutions in shaping their digital transformation.

The challenges of ecological change are our drive for creating efficient, optimized and holistic solutions for the benefit of our customers, the environment and the future generations.
